

What you need to know about COVID-19

To prevent COVID-19

Wear a facemask

Stay 6 feet apart

Stay at home when sick

Avoid large gatherings

Travel only if needed

Symptoms of COVID-19

Cough

Headache

Fever

Sore throat

Muscle pain

Shortness of breath or difficulty breathing

New loss of smell or taste

Additional symptoms:

- Chills
- Runny nose
- Nausea
- Vomiting
- Diarrhea

When do symptoms appear?

- Symptoms can range from mild to severe illness and appear two to 14 days after you are exposed to the virus that causes COVID-19.

Seek immediate medical attention if you have:

- Persistent pain or pressure in the chest
- New confusion
- Inability to wake up or stay awake
- Bluish lips or face
- Difficulty/trouble breathing

What to do if you have the virus or have been exposed to COVID-19

For CASES (people who have been diagnosed with COVID-19)

If you are vaccinated or unvaccinated:

- Stay at home for at least 10 days after you start feeling sick, symptoms are improving, and you are fever free for 24 hours without fever-reducing medications (or 10 days after your positive test if you never felt sick; Day 1 is the day after symptoms start or day after test date if no symptoms).
- Treat yourself with over-the-counter remedies to reduce your symptoms, drink plenty of fluids, and get plenty of rest.
- Stay away from the rest of your household members and do not go out in public— including going to the grocery store, gas stations or other public areas.
- Do not get retested—your test may remain positive for some time, but most people cannot infect others after 10 days.

For CONTACTS (people who have been within 6 feet of someone diagnosed with COVID-19 for a total of 15 minutes or more over 24 hours)

If you are Unvaccinated or Partially Vaccinated:

- Stay at home for at least 10 days after your last contact with the sick person and monitor for symptoms for 14 days.
- Do not go out in public— including going to the grocery store, gas stations or other public areas.
- If you have symptoms, get tested right away.
- If you don't have symptoms, you may end your quarantine after 7 days IF you receive a negative PCR test on Day 5 or later.

If you are fully vaccinated (more than 2 weeks after your final vaccine dose).

- If you develop symptoms, get tested right away and stay home until your test results.
- If you don't have symptoms then you are not required to stay home but should get tested 3-5 days after last contact, wear a mask indoors and monitor for symptoms for 14 days.

If you live with others, stay in a specific "sick room" or area and away from other people or animals, including pets. Use a mask if you need to go out of your room and clean any shared spaces between uses. Use a separate bathroom if available.
